Professional Summary

Backend Software Engineer with 2+ years of experience building Java-based applications, RESTful APIs, and microservices. Hands-on experience deploying on Microsoft Azure with CI/CD automation via Jenkins, plus working knowledge of AWS. Strong foundation in Spring Boot, Spring MVC, and JUnit-based testing. Seeking a backend Java / Microservices role with cloud infrastructure responsibilities.

Technical Skills

Languages:	Java, JavaScript
Backend & Frameworks:	Spring Boot, Spring MVC, RESTful APIs, Microservices, OSGi, Sling Servlets, Node.js
Cloud & DevOps:	Microsoft Azure (Deployments, CI/CD), AWS, Jenkins, Git, GitHub, Maven
Testing:	JUnit, Unit Testing
Database:	MySQL, MongoDB
Other:	JCR, ACS Commons, Groovy, SQL2, React.js, HTML, CSS

Experience

Capgemini <i>Software Engineer</i>	June 2024 – Present <i>Bangalore, India</i>
--	--

- Developed and maintained backend services in **Java** and **Spring Boot** for Atlas Copco's global career portal, supporting job listing and application workflows for a multinational client.
- Engineered an automated job-expiry feature for the Atlas Copco career page, improving data accuracy and reducing manual content maintenance.
- Designed and customized an event-driven asset-publish notification system, automating stakeholder alerts on content updates.
- Built and exposed **RESTful APIs** using Sling servlets and **OSGi**-based modular backend services to support content and business logic.
- Deployed, configured, and monitored applications on **Microsoft Azure**, collaborating on **CI/CD** pipelines using **Jenkins** to streamline build and release cycles.
- Contributed to **microservices**-based systems built with **Java**, **Spring**, and **Node.js**, working across service boundaries to integrate backend functionality.
- Wrote and maintained **JUnit** test suites to validate business logic and improve code reliability.
- Automated repository and content maintenance tasks using **Groovy** scripting, reducing manual effort for recurring operations.
- Implemented role-based access control and security policies, managing user permissions in line with best practices.

Projects

ChatIQ – AI Chat Application <i>MERN Stack (MongoDB, Express, React, Node.js)</i>	Nov 2023
---	----------

- Built a full-stack AI chatbot application integrating the **OpenAI API** for real-time conversational responses.
- Implemented secure **JWT**-based authentication with persistent HTTP-cookie sessions.
- Designed **MongoDB** schema to persist and manage user chat history with user-controlled deletion.
- Developed a responsive Material-UI interface with support for rendering code blocks.

LinkedIn Job Recommender <i>Python, Selenium</i>	Dec 2022
--	----------

- Automated extraction of skills from LinkedIn profiles using **Selenium** web scraping.
- Built a recommendation script matching extracted skills to target job roles, exporting ranked job URLs to CSV.

Certifications

- Adobe Certified Professional – Adobe Experience Manager (AEM)
- AWS Certified Cloud Practitioner
- Java Certification

Education

Presidency University <i>Bachelor of Technology – Computer Engineering</i>	Aug 2019 – June 2023 <i>Bangalore, India</i>
